PREFACE

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data.

Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

If you have any inquiries concerning this publication please contact the editor, John Callinan, telephone (08) 8237–7307. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272, Adelaide SA 5001, telephone (08) 8237 7100.

REVIEW

South Australian Overview

- Merchandise exports where the final stage of production was in South Australia were valued at \$411.6 million in July 1997, a 1.3% increase on June and 12.8% on July 1996.
- In July 1997 the value of merchandise imports released from Customs control in South Australia were \$377.0 million, a 32.4% increase on the previous month and a 42.1% increase on July 1996.
- The trend estimate for retail turnover increased by 0.8% in July 1997.
- The trend for total new vehicle registrations in July 1997 decreased 0.3% and is the second month of decline after seven months growth.
- The trend estimate at current prices for private new capital expenditure in South Australia for the June quarter 1997 rose by \$5 million (0.8%) to \$639 million.
- Supply and demand for accomodation in hotels, motels and guesthouses were largely unchanged in June quarter 1997 compared with June quarter 1996.
- The trend estimate for the total number of dwelling unit approvals increased by 0.3% in July 1997.
- The total value of building approved in July 1997 was \$187.0 million, of which \$51.1 million was new residential building and \$125.1 million non residential building.
- During the June quarter 1997 the Price Index of Established Houses in Adelaide fell 0.3% and the Project Home Index decreased 0.7%.
- At 31 March 1997 the estimated resident population of South Australia was 1,478,689.
- There were 4,271 short term overseas visitor arrivals to South Australia during June 1997 in contrast to the 12,052 short term resident departures overseas.
- The trend estimate of employed persons in South Australia was 661,600 in August 1997, slightly higher than the level (659,600) in August 1996.
- The trend unemployment rate for South Australia has remained flat at 9.7% in August 1997.
- There were 100 working days lost through industrial disputes during June 1997.
- Total housing finance commitments (original figures including alterations and additions) decreased 4.1% to \$254.2 million.

State Accounts

NOTE: Deficiencies in the data sources used to estimate gross operating surplus for recent quarters may at times lead to the current price estimates of gross state product GSP(I) being under or over stated for particular States. Consequently, the measured growth rate for constant price GSP(I) for those States will also be affected.

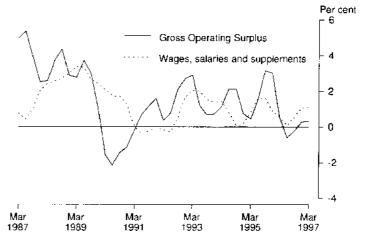

The constant price series for gross state product (GSP) have been labelled as 'experimental'. Users are cautioned that these estimates are derived indirectly by calculating a deflator from the expenditure components. It is emphasised that, at times, movements that can not be fully explained may be introduced into the constant price GSP(I) series through the use of this proxy deflator.

Trend Estimates (Current Prices)

Growth in GSP of 0.8% in the March quarter was the highest recorded since the December quarter 1995. Despite this increase, the growth of 1.3% through the year to March quarter 1997 was the lowest for any State.

Contributing to the March quarter growth was an increase of 1.1% in wages, salaries and supplements. The annual increase through to March quarter 1997 was 2.9% compared with the national increase of 6.6%.

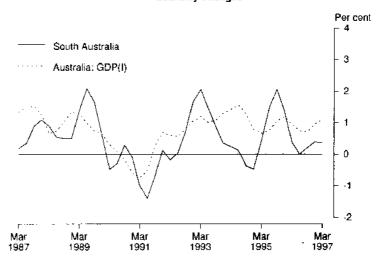

Gross operating surplus increased by 0.3% in the March quarter following similar weak growth in the December quarter 1996. A fall of 0.2% was recorded for the year to March quarter 1997.

Indirect taxes less subsidies increased by 0.7% in the March quarter, the largest increase since March quarter 1996.

Trend Estimates (Constant Prices)

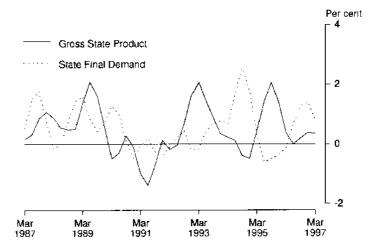

The experimental estimate of GSP at constant prices grew by 0.4% (1.1% nationally) in the March quarter and by 1.0% in the year to March 1997, considerably below the national average of 3.6%.

State final demand (SFD) increased by 0.8% in the March quarter and has, for the past four quarters, grown at a faster rate than GSP. Contributing to the growth in SFD was a 1.8% increase in private gross fixed capital expenditure which has shown the highest annual growth to March quarter 1997 (24.1%) of any State.

GROSS STATE PRODUCT AND STATE FINAL DEMAND - TREND (CONSTANT PRICES) Quarterly Changes

Private final consumption expenditure grew by 0.3% in the March quarter, the same rate as for the previous two quarters. The increase of 1.2% through the year to the March quarter 1997 was the second lowest of any State and approximately half the national average (2.3%).

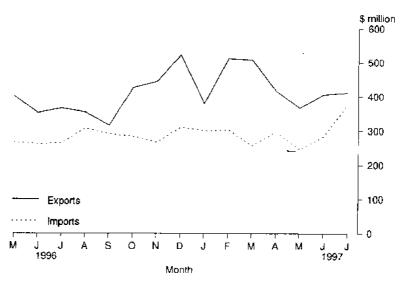

International Accounts

Exports

Merchandise exports where the final stage of production was in South Australia were valued at \$411.6 million in July 1997, a 1.3% increase on June and 12.8% on July 1996. The major commodity groups exported during the month were road vehicles, parts and accessories worth \$53.1 million, metals and metal manufactures \$47.2 million, machinery \$41.2 million and wine \$38.8 million.

The major destinations of South Australian exports in July 1997 were the United States of America with \$75.8 million and Japan with \$45.8 million. Exports to China increased \$15.3 million to \$30.8 million in July 1997. The Middle East was also another major destination for exports with \$33.0 million, up from \$19.8 million in June.

MERCHANDISE EXPORTS AND IMPORTS

Imports

In July 1997 the value of merchandise imports released from Customs control in South Australia were \$377.0 million, a 32.4% increase on the previous month and a 42.1% increase on July 1996. The increase of \$92.2 million on the previous month was mainly the result of increases in the importation of machinery, up \$41.6 million to \$108.1 million, road vehicles, parts and accessories, up \$28.8 million to \$83.4 million and petroleum products, up \$27.2 million to \$66.5 million.

Consumption and Investment

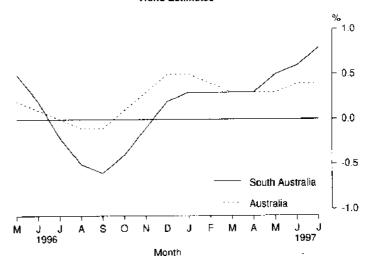

Retail Turnover

The trend estimate for retail turnover increased by 0.8% in July 1997 and has grown steadily since December 1996. The Australian trend estimate has recorded growth of 0.4% in both June and July 1997.

Over the three months to July 1997 the trend estimate has increased by \$15.3 million. The major contributors to this growth were clothing and soft good retailing (\$3.9 million), household good retailing (\$3.4 million), and other retailing (\$2.3 million). All other industry groups showed minor increases in this period.

In original terms, South Australian retail turnover was \$804.6 million, an increase of 5.0% on July 1996.

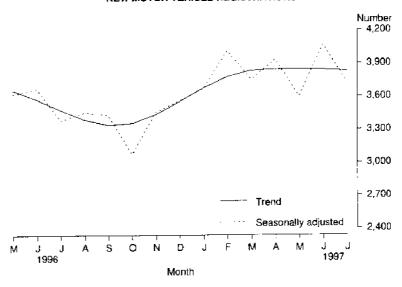

RETAIL TURNOVER
PERCENTAGE CHANGE FROM PREVIOUS MONTH
Trend Estimates

New Motor Vehicle Registrations The trend for total new vehicle registrations decreased 0.3% in July 1997 and is the second month of decline. The Australian trend rose for the tenth consecutive month although the rate of increase has weakened.

In original terms there were 3,896 new motor vehicles registered in July 1997, a decrease of 12.2% on June and a 12.7% increase on July 1996. For new passenger vehicles, the leading makes registered in June 1997 were Mitsubishi (658 vehicles), Holden (630), Ford (583), Toyota (406) and Hyundai (270).

NEW MOTOR VEHICLE REGISTRATIONS

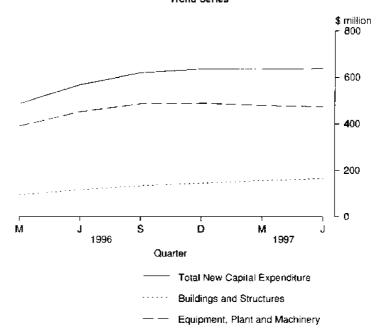

Private New Capital Expenditure The trend estimate at current prices for private new capital expenditure in South Australia for the June quarter 1997 rose by \$5 million (0.8%) to \$639 million. Expenditure on buildings increased by 6.4%, while expenditure on equipment fell by 1.3%. The Australian total rose by 2.9%.

Private new capital expenditure in original terms for the June quarter 1997 was \$720 million, an increase of 32.1% from the June quarter 1996. Buildings and structures accounted for \$159 million, and equipment, plant and machinery \$561 million. For the 12 months ended June 1997, there was a 37.6% increase on the previous year, mainly due to the large capital expenditure by the mining industry, increasing from \$196 million to \$488 million.

Information on expected capital expenditure data is contained in the Forward

Tourist Accommodation

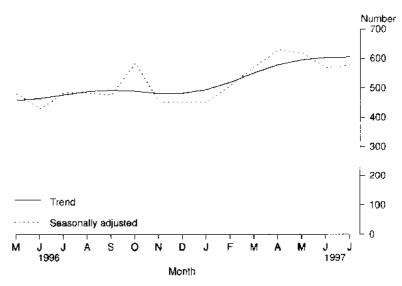

When June quarter 1997 is compared with June quarter 1996, the number of rooms available in hotels, motels and guesthouses in South Australia was largely unchanged, with 10,842 rooms. The room occupancy rate fell marginally to 51.1%. Takings from accommodation increased by 3.2% from \$39.1 million to \$40.4 million with the average takings per room night occupied rising from \$77 to \$80.

Production

Dwelling Approvals

The trend estimate for the total number of dwelling unit approvals increased by 0.3% in July following rises of 1.3% in June, 2.9% in May and 4.9% in April demonstrating that the rate of growth is slowing and will be halted unless the seasonally adjusted estimate for August increases by more than 8%. The total number of dwellings approved, in original terms for July 1997 was 634. Of these, private sector houses accounted for 571 and other residential dwelling units 47.

DWELLING UNITS APPROVED

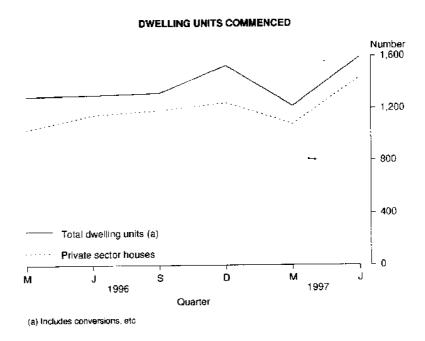

The trend in total dwelling units approved for Australia has declined for the fourth month falling by 1.3% in July 1997. Both private sector houses and other residential units also reflect this downward trend. In original terms, South Australia accounted for 5.0% of the total dwelling units approved in Australia during July 1997.

Dwelling Commencements

The trend for the number of dwelling units commenced rose by 8.3% in the June quarter 1997. This follows a rise of 6.6% in the March quarter 1997 and was 17.9% above the level of a year ago.

In original terms, 1,597 dwelling units were commenced in the June quarter 1997, an increase of 375 or 30.7% from the previous quarter.

During 1996-97 there were 5,671 dwellings commenced, a decrease of 4.8% from 1995-96. The number of new houses commenced fell by 1.1% to 5,014 and new other residential dwellings fell by 24.3% to 632.

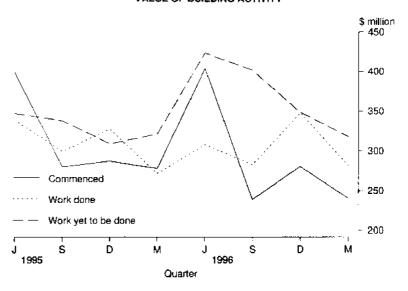

Value of Building Approvals The total value of building approved in July 1997 was \$187.0 million of which \$51.1 million was new residential building and \$125.1 million non-residential building. The value of non-residential building rose by 36.0% from June 1997 and is the highest since May 1996. Both factories (\$71.8 million) and entertainment and recreational (\$20.8 million) sectors were the main contributors to the value of non-residential building for July 1997 in South Australia, contributing over 70% to the total non-residential building value.

Value of Total Building Activity The total value of building work commenced in South Australia during the March quarter 1997 fell by 14.3% to \$240.7 million. This decrease can be attributed to the residential building sector which had fallen 25.7% (to \$124.6 million) from the previous quarter.

The total value of building work done during the March quarter 1997 decreased by 18.9% to \$282.3 million with both the residential and non-residential building sectors recording falls of more than 13.0%. Nationally the value of work done also recorded a decrease, falling 9.2% to \$6,658.3 million.

For the March quarter 1997, the total value of building work yet to be done in South Australia was \$318.1 million, a decrease of 8.8% from the previous quarter while the corresponding national figure increased by 3.5%. Expressed as a proportion of the national total, the total value of building work yet to be done in South Australia was 3.2% for the March quarter 1997 down from the previous quarter of 3.6%.

Value of Engineering Construction In March quarter 1997, the value of engineering construction work done in South Australia remained constant at \$187.6 million compared with a 14.1% fall nationally. South Australia had a 5.7% share of the national total of \$3,318.7 million. The value of work commenced during the quarter increased by 13.4% to \$240.4 million for South Australia while the corresponding national figure fell by 17.1% to \$3,114.7 million. The South Australian proportion of national commencements was 7.7% for the March quarter 1997.

Manufacturing Production

Note: The frequency of compilation and publication of Manufacturing Production will be reduced from monthly to quarterly. There is also a reduced range of data items collected on a State basis which will impact on the time series available on pages 38 & 39 of this bulletin.

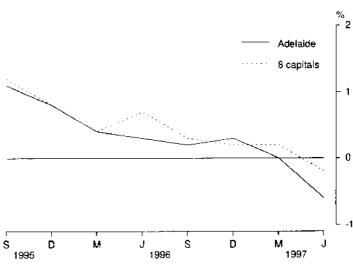

Prices

Consumer Price Index

The Consumer Price Index (all groups) in Adelaide decreased by 0.6% between the March and June quarters 1997. A fall in the index was last recorded in June quarter 1992. Contributing most to the overall decrease for the June quarter were falls in mortgage interest charges, motor vehicles and fuels.

The annual movement in the Adelaide index was (-0.1%).

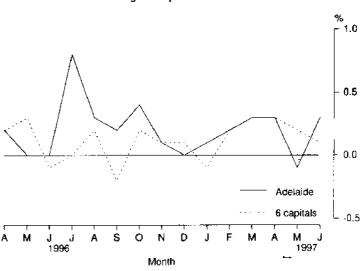

House Building Materials

Adelaide recorded a rise of 0.3% in the Price Index of Materials used in House Building for the month of June. The main factor contributing to the rise was an increase in plastic pipes and fittings. The weighted average for the six State capitals rose 0.1% for the same period.

For the twelve months to June, a rise of 3.0% was recorded in the Index for Adelaide, with only a 1.4% rise for the weighted average of the six State capitals.

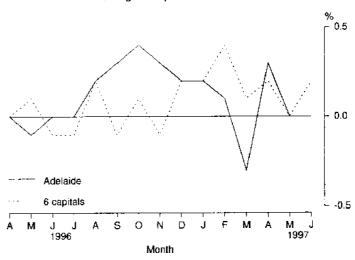

MATERIALS USED IN HOUSE BUILDING Change from previous month

Non-house Building Materials The Price Index of Materials Used in Building Other than House Building showed no movement in Adelaide for the month of June 1997. The weighted average of the six State capitals recorded a rise of 0.2% for the same period.

The Index shows a rise of 1.6% for the twelve months to June for Adelaide, with the weighted average of the six State capitals showing a 1.2% rise.

MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING Change from previous month

Note: The frequency of compilation and publication of the Building indexes will be reduced from monthly to quarterly. The June data is the last monthly release. From September 1997, the data will be released on a quarterly basis and data for that quarter will be included in the November edition of this bulletin.

House Prices

During the June quarter 1997 the Price Index of Established Houses in Adelaide fell by 0.3% and the Project Home Index decreased 0.7%. The weighted average of the eight capital cities index, over the same period showed a 1.3% increase for established houses and no change for project houses.

Over the year to the June quarter 1997 the Established House Price Index for Adelaide rose 1.0% whilst the Project Home Price Index fell by 4.6%. Nationally, the indexes showed a 2.8% increase and a 0.4% decrease respectively.

Passenger Transport Costs The passenger transport cost index measures changes in the costs of operating a public transport passenger bus service in Adelaide. Costs covered include labour costs, leasing charges, registration and insurance, repairs and maintenance, fuel and overheads. The index has been compiled on a quarterly basis from September 1995 with a base of 100.0 in 1993-94. The June quarter 1997 index was 108.0, and showed no movement between March and June 1997. The index showed a 3.6% increase in the 12 months to June 1997.

Labour Force and Demography

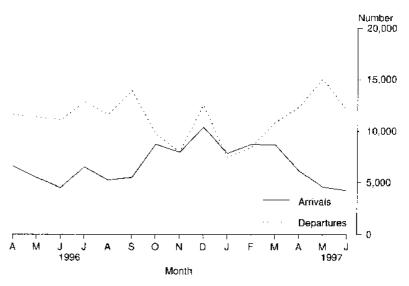

Population

At 31 March 1997 the estimated resident population of South Australia was 1,478,689. This was an increase (1,916) persons from the December quarter. The continuing low growth for South Australia is attributable to a net outflow in interstate migration of 1,192 persons which was partly offset by a net inflow of overseas migration of 1,228 persons. In the March quarter there was a natural increase of 1,880 persons.

Short term Overseas Visitor Arrivals There were 4,271 short term overseas visitor arrivals to South Australia during June 1997. This represents a fall of 7.0% from May arrivals and was 5.6% lower than June 1996. In contrast, arrivals to Australia increased, up 6.6% from May 1997 to 308,177. The South Australian share of short term overseas arrivals to Australia decreased to 1.4% in June 1997.

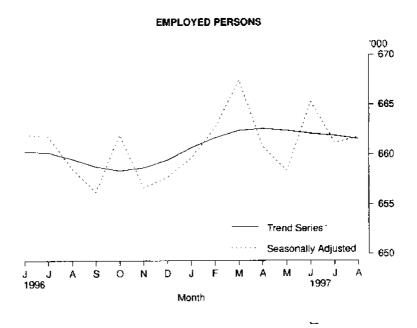

Short term Resident Departures There were 12,052 short term resident departures overseas from South Australia in June 1997. This has fallen by 19.8% since May 1997, but represents an increase of 8.6% compared with the same time last year. Australia recorded a rise in resident departures in June 1997 when compared with May 1997 and June 1996, increasing 11.5% and 7.0% respectively. South Australia accounted for 4.3% of all short term resident departures from Australia.

SHORT TERM OVERSEAS ARRIVALS AND DEPARTURES

Employment

The trend estimate of employed persons in South Australia was 661,600 in August 1997, slightly higher than the level (659,600) in August 1996. The main contributing factor has been a rise in full-time employment of 0.7% over the past twelve months.

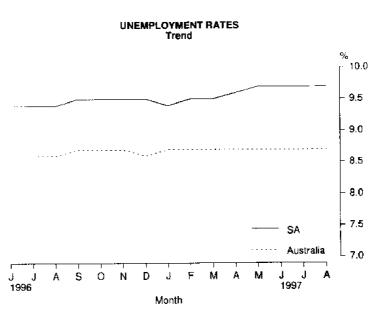

Unemployment

The trend unemployment rate for South Australia has remained flat at 9.7% in August 1997. However, this rate is still higher than than the 9.4% recorded in August 1996.

In August 1997, the median duration of unemployment, (one half of all observations lie above this value, and the other half below) was 31 weeks, up from the 26 weeks recorded twelve months ago, and the highest August value since 1993 (when the median peaked at 32 weeks).

In original terms, the teenage full-time unemployment rate was 28.7% in August 1997, compared with 35.5% in August 1996. After reaching a recent high of 42.7% in April 1997, the rate has fallen for four consecutive months.

The trend estimate of the unemployment rate for Australia has remained at 8.7% for the whole year.

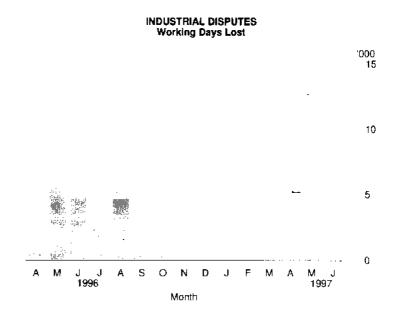

Overtime

In original terms, the proportion of employees who worked overtime in South Australia in May 1997 was 15.9%. This was lower than the May 1996 estimate of 16.1%.

In May 1997, employees who worked overtime in South Australia recorded an average of 6.8 overtime hours per week. This was higher than the 6.6 overtime hours recorded a year earlier.

Industrial Disputes

There were 100 working days lost through industrial disputes in South Australia during June 1997. Tasmania and Northern Territory were the only other States/Territories with less industrial disputation. South Australia accounted for less than 1% of the Australian total. The number of working days lost in South Australia for the year ending June 1997 was 15,100, a decrease of 17,900 over the preceding 12 months.

Incomes

Average Weekly Earnings

The trend estimate of average weekly ordinary time earnings of full-time adult male employees in South Australia has increased by 1.6%; up from \$682.30 in February 1997 to \$692.90 in May 1997. For females, the corresponding increase was less pronounced at 0.9%; up from \$579.30 in February 1997 to \$584.40 in May 1997.

Between February 1997 and May 1997, the trend estimate of average weekly total earnings of all employees (including part-time workers) in South Australia rose by 1.3% to \$536.20. Over the same period, the national level increased by 0.5% to \$546.60.

Note: Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

Award Rates of Pay

In the 12 months to June 1997, the weekly award rates of pay index for full-time employees in both South Australia and Australia increased by 1.4%.

Note: June was the last month of issue of this index. It will be replaced by a wage costs index, due for release in May 1998 and covering the December 1997 quarter. Non-wage costs, for example fringe benefits tax and payroll tax, will be added in consecutive stages to produce a composite labour costs index. This indicator should be available in early 1999.

Financial Markets

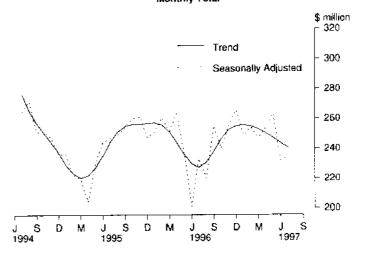

Housing Finance

The trend estimate for total dwellings financed in July 1997 fell by 1.2% to \$240.8 million, the fifth consecutive monthly decrease. Seasonally adjusted, the value of commitments in South Australia was \$234.7 million, up 1.1% on June.

Total housing finance commitments (original figures including alterations and additions) decreased 4.1% to \$254.2 million, 2.0% below the previous July. Nationally, there was an increase of 5.4% for the month, 5.9% above the previous July. The State's housing commitments dropped to 5.3% of the national total. The average borrowing size was \$81,000 compared with the Australian average of \$110,700.

Construction of dwellings decreased 6.8% to \$31.6 million continuing the fall from the three year high recorded for May. The past four months have been significantly above the corresponding months of the previous year. Commitments for the purchase of established dwellings (the main category) were down 7.0% to \$148.4 million, marginally below the previous July. Commitments for newly erected dwellings were up 14.7% to \$8.0 million. Refinancing increased 4.7% to \$55.4 million, 3.4% below July last year. Alterations and additions decreased 9.0% to \$10.8 million, half the previous July and representing 4.2% of total commitments.

SECURED HOUSING FINANCE COMMITMENTS TO INDIVIDUALS (ALL LENDERS) (Excluding Alterations and Additions) — Monthly Total

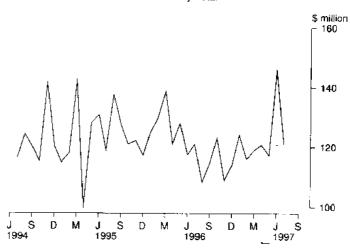

Personal Finance

Total commitments rose 3.1% to \$257.4 million in July due to the large increase in revolving credit commitments particularly unsecured credit limits which offset the fall in fixed loan facilities. Nationally, total commitments rose 12.5% to be 21.6% above July 1997 with the major increase also being in revolving unsecured facilities.

Total South Australian revolving credit facilities increased 31.1% to \$136.3 million, with unsecured credit facilities up 79.8% to a record \$82.2 million. This increase was spread over credit card and other facilities made available particularly by banks and credit unions. Secured revolving credit facilities decreased 7.1% in July to \$54.1 million. (Note: There are difficulties at present in obtaining reliable State secured commitments under revolving credit facilities).

Fixed loan commitments decreased 16.9% to \$121.1 million following the record June figure. The largest decrease was for refinancing down 33.9% to \$17.5 million, 29.0% below the previous July. Used motor vehicles and station wagons decreased 15.6% to \$37.6 million from the June peak. New motor vehicles and station wagons decreased 6.5% to \$14.5 million, following three high months. The largest increase was for debt consolidation up 6.9% to \$13.8 million, 7.8% above the previous July.

PERSONAL FINANCE COMMITMENTS FIXED LOAN COMMITMENTS (ALL LENDERS) Monthly Total

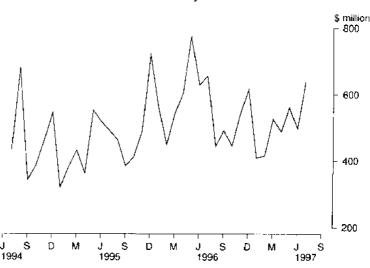

Commercial Finance

Total commercial finance commitments increased 28.6% to \$640.2 million, 2.5% below July 1996. South Australia's proportion of the national total rose to 4.0%. All the past eight months have been below the corresponding months of the previous year.

Commitments under fixed loan facilities increased 17.6% to \$419.3 million, the sixth consecutive monthly increase. The main increases were property and business services (up \$33.8 million), community services (up \$25.3 million), construction (up \$22.9 million) and agriculture, forestry, fishing and hunting (up \$14.5 million). The main decline was the other industries category which dropped \$58.7 million from the very high June figure.

Revolving credit facilities increased 56.3% to \$220.9 million, 2.8% of the national total and 33.4% below July 1996. The main increases were for agriculture, forestry, fishing and hunting, up \$27.6 million to \$47.5 million, and construction, up \$16.0 million to \$26.1 million. The main fall was for recreational, personal and other services which decreased \$17.6 million to \$10.6 million following a high June.

Lease Finance

New finance lease commitments decreased marginally to \$30.0 million from the June peak. This was 31.5% above the previous July. Nationally the decrease for the month was 7.0%, 21.5% above the previous July. The South Australian proportion of the national total rose to 3.5%.

The main decreases were construction and earthmoving equipment, down 54.5% to \$1.3 million following two high months, and agricultural machinery and equipment, down 34.2% to \$2.0 million but 39.9% higher than the previous July. The main increase was for electronic data processing equipment, up \$1.9 million to \$2.7 million. New motor cars and station wagons not subject to depreciation increased 5.6% to \$6.8 million, the fourth consecutive monthly increase and 15.7% above July 1996. Manufacturing equipment declined only marginally from the June peak to \$4.9 million.

Forward Outlook

Composite Leading Indicator The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to assist the detection of turning points between successive expansions and slow downs of economic activity as measured by constant price GDP(A). It does not attempt to forecast the level of economic activity.

In the March quarter 1997:

- the experimental CLI rose 0.11%, following rises of 0.23% and 0.22% in the September and December quarters respectively;
- the last turning point in the deviation from its long-term trend for average Gross Domestic Product GDP(A) was a peak in the March quarter 1996. The largest positive contribution came from the production expectations, while the largest negative contribution was from the (lagged) inverted real interest rate.

The quarterly data are released in more detail in the Australian Economic Indicators (Cat. no. 1350.0). The CLI was the topic of the Focus article in the September 1993 edition of South Australian Economic Indicators (1307.4). A review of the performance of the CLI and its components was published in the July 1997 issue of 1350.0.

Australian Business Expectations Surveys of business expectations have been available to decision makers for a number of years from several sources. These surveys provided *qualitative* indicators in the form of the net proportion of businesses expecting a rise or fall in future business conditions. Since the December quarter 1993, the ABS has been compiling a *quantitative* indicator of business expectations in the form of an expected weighted aggregate change in a range of economic variables. These data are available on a quarterly basis in *Australian Business Expectations* (Cat. no. 5250.0).

AUSTRALIAN BUSINESS EXPECTATIONS SOUTH AUSTRALIA AND AUSTRALIA SALES OF GOODS AND SERVICES EXPECTED PERCENTAGE AGGREGATE CHANGE

	Short t	erm	Medium term Expected aggregate change between			
	Expected aggregat	e change between

	%	%	%	%		
South Australia	2.8	0.0	4.0	3.4		
Australia	1.6	0.7	2.9	2.4		

Short term

Businesses in South Australia expect no change in sales of goods and services in the September quarter 1997 compared with the June quarter while the Australian expectation was a 0.7% increase. Nationally, sales of goods and services are expected to increase in all industries except construction (-3.2%) and retail (-0.1%).

Medium term

Businesses in South Australia expect sales of goods and services in the June quarter 1998 to be 3.4% above June quarter 1997. The Australian expectation was for 2.4% growth. The South Australian expectation of 3.4% was the second largest of all States and Territories.

Expected New Capital Expenditure State estimates of actual new capital expenditure by private businesses in Australia are compiled each quarter. Details appear on pages 6, 20 and 28 of this publication.

Each December businesses in the survey are asked for details of their longer term expectations for capital expenditure by State enabling estimates to be made for periods 6 months and 18 months ahead of the reference period. The collection of expectations in the December quarter survey also allows the derivation of a composite estimate (6 months actual plus 6 months expectations) for that financial year.

The following table shows the forward estimates made with the December 1996 collection.

EXPECTED PRIVATE NEW CAPITAL EXPENDITURE BY SELECTED INDUSTRY AND TYPE OF ASSET SOUTH AUSTRALIA

	6 months to June 1997	1996-97	199 7-98
Selected industries and type of asset	\$m	\$m _	\$m
Mining	140	280	228
Manufacturing	642	1 051	702
Other	502	1 240	8 57
Total expenditure	1 284	2 571	1 787
Buildings etc.	302	596	511
Equipment etc.	982	1 975	1 276

Once actual expenditure for a financial year is known, it is useful to investigate the relationship between previous expectations and the expenditure that was actually incurred. The resultant realisation ratios (subsequent actual expenditure divided by expected expenditure) then indicates how much expenditure was actually incurred against the amount expected to be incurred at various times of reporting.

Realisation ratios provide an important tool in understanding and interpreting statistics for future periods. The application of realisation ratios enables the adjustment of expectation data for known under (or over) realisation patterns in the past and hence provides a valid basis for comparison with other expectation data and actual expenditure estimates.

The following table shows the average realisation ratios over the past 4 years for the composite estimate (6 months actual and 6 months expected) and the 12 month expectation from the December quarter surveys.

RATIOS OF ACTUAL PRIVATE NEW CAPITAL EXPENDITURE TO EXPECTED PRIVATE NEW CAPITAL EXPENDITURE BY SELECTED INDUSTRY AND TYPE OF ASSET - 4 YEAR AVERAGES SOUTH AUSTRALIA

Selected industries and type of asset	Composite estimate	12 month expectation
Mining	0.88	1.18
Manufacturing	0.97	1.06
Other	0.98	1.58
Total expenditure	0.96	1.25
Buildings etc.	0.96	1.53
Equipment etc.	0.96	1.19

ABS PUBLICATIONS AND PRODUCTS

Statistics collected by the ABS are generally made available in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues on Tuesdays and Fridays a Release Advice (1105.0) which lists publications to be released within the next few days. The Catalogue and Release Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the ABS Publication Mailing Service on 1800 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The ABS Information Consultancy Service has specialist staff to assist and advise clients with their statistical inquiries. For more detailed information about these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 8237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide SA 5001.

The ABS also provides a Statistical Consultancy Service, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, statistical modelling. For more information contact Gary Niedorfer, on (08) 8237 7379.

SYMBOLS AND OTHER USAGES

not available n.a.

not yet available n.y.a.

not applicable

nil or rounded to zero 0.0.0

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

National Dial-a-Statistic Line

0055 86 400

Steadycom P/L: premium rate 25c/20 secs.

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

Internet

http://www.abs.gov.au

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
